DON'T FORGET TO ASK ABOUT The new "CONCRETE BARRIER GRAB & CURBING TONG" by Clamp-Co., Inc.

For years we have manufactured the highest quality Pipe Grabs and Beam Clamps and now we are offering the most robust and durable concrete barrier grab and curbing tongs you can buy. Continuing in the Clamp-Co. Inc. tradition of designing and building equipment that will stand the rigors of everyday use with minimum maintenance and long working life, our Clamp-Co Barrier Grab & Curbing Tong is made with T-1 Steel, fatigue proof pins, and our own indexing mechanism which was designed and tested through the University of Maine Advanced Manufacturing Center College of Engineering.

Our grabs are designed for repetitive lifting of standard sized concrete barriers with virtually no manual assistance. Available with polyurethane pads or hardened steel points.

When you look at our quality product you will see the difference.
